

ON-LINE FIG 1. Method used to compare brain movement in reference to the skull post–bed rest compared with pre–bed rest.

ON-LINE FIG 2. Individual variability of ventricle sizes pre- and post–bed rest.

ON-LINE FIG 3. Morphologic brain changes after bed rest. Images were thresholded at $P = .001$ ($t = 3.1$, uncorrected). Areas demonstrating a significant increase in tissue density include the premotor cortex, primary motor cortex, sensory cortex, posterior cingulate, cuneus, thalamus, and cerebellum. Areas demonstrating a significant decrease in tissue density include the orbital frontal cortex, the hippocampi, corpus callosum, striatum, anterior cingulate, parietal operculum, and brain stem. The lower part of figure illustrates the detailed region-specific morphologic changes along the central frontoparietal lobes (Broadmann areas 1–4, and 6).

On-line Table 1: Pre- and post-bed rest MRI and physiologic measurements of each individual subject: ventricular volume changes

Subject	Ventricle Volume (mL)			ICV (mL)		
	Pre-	Post-	% Change	Pre-	Post-	% Change
A	17.8	18.6	4.49	1478.03	1539.715	4.17
