

On-line Table: Lesion intensity and in-plane size^a

	Lesion-Diameter Group			Lesion-Intensity Category		
	AD1	AD2	AD3	I1	I2	I3
Axial	106	300	43	51	201	197
Axial and sagittal	49	188	40	31	117	129
	46.2%	62.7%	93%	60.8%	58.2%	65.5%

^a Data are detection rates of lesions dependent on their in-plane size and intensity. The AD of each lesion was assessed (AD1 < 0.3 cm, AD2 = 0.3–0.5 cm, AD3 > 0.5 cm), and lesions were grouped according to their intensity (I1 = low intensity, I2 = intermediate intensity, I3 = high intensity relative to CSF).
