

On-line Table 1: Criteria for determination of pseudoproggression, from Chinot et al, 2013⁴

Criteria
1) $\geq 25\%$ Increase in sum of the longest perpendicular diameters of all enhancing lesions compared with baseline; if pseudoproggression is observed on nonenhancing lesions, then unequivocal progression of existing nonenhancing lesions and
2) No new lesions outside of the field of irradiation and
3) No significant clinical neurologic deterioration,
4) Pseudoproggression will be confirmed at the next disease assessment performed 2 mo later

On-line Table 2: Acquired imaging and compliance rates^a

Site	Total No. of Scans				Multimodal Imaging Compliance (%)		
	Anatomic	Diffusion	Perfusion	Spectroscopy	Diffusion	Perfusion	Spectroscopy
1	4	3	3	0	75	75	0
2	5	5	0	0	100		0
